This Acrobat document was generated by me, Colin Hinson, from a document held by me, believed to be out of copyright. It is presented here (for free) and this pdf version of the document is my copyright in much the same way as a photograph would be. If you believe the document to be under other copyright, please contact me.

The document should have been downloaded via my website <https://blunham.com/Radar>, or any mirror site named on that site. If you downloaded it from elsewhere, please let me know (particularly if you were charged for it). You can contact me via my Genuki email page: <https://www.genuki.org.uk/big/eng/YKS/various?recipient=colin>

**You may not copy the file for onward transmission of the data nor attempt to make monetary gain by the use of these files. If you want someone else to have a copy of the file, point them at the website (<https://blunham.com/Radar>). Please do not point them at the file itself as it may move or the site may be updated.**

It should be noted that most of the pages are identifiable as having been processed by me.

---

I put a lot of time into producing these files which is why you are met with this page when you open the file.

In order to generate this file, I need to scan the pages, split the double pages and remove any edge marks such as punch holes, clean up the pages, set the relevant pages to be all the same size and alignment. I then run Omnipage (OCR) to generate the searchable text and then generate the pdf file.

Hopefully after that, I end up with a presentable file. If you find missing pages, pages in the wrong order, anything else wrong with the file or simply want to make a comment, please drop me a line (see above).

If you find the file(s) of use to you, you might like to make a donation for the upkeep of the website – see <https://blunham.com/Radar> for a link to do so.

# PICNIC PARANOIA\*

FROM ATARISOFT™

Experience New Thrills on the TI 99/4A#

# SCORING

Each round lasts 90 seconds. Each round progresses in difficulty. You can choose to start the game at any of the first 6 round #'s. The time remaining is indicated at the top of the screen.

Points are tallied after each round is complete. You and George score points in several ways:

-  "Robbing" Ants ..... 10 points x round #
-  "Stinging" Wasps ..... 40 points x round #
-  "Jumping" Spiders ..... 20 points x round #
- Food left on the table ..... 40 points x round #
- Food off the table on the grass ..... 80 points x round #

Every 5,000 points George earns a can of bug spray. Hitting the letter "S" on the keyboard activates the spray and kills the insects on the screen, but will not destroy spider webs. The accumulated cans of spray are indicated at the top of the screen.

The 4 red exit doors on each side of the screen can be used for a quick escape, and repositions George on the opposite side of the screen.

# CAN GEORGE GET TOUGH AND SAVE HIS LUNCH?

Load the Picnic Paranoia cartridge into your Texas Instruments 99/4A Computer as explained in your computer owners manual, and turn on your computer. Plug the joysticks into the controller port. This is a one player game.

Press Enter to get to the Option Screen.

Press the Plus Key (+) to choose one of 6 difficulty levels.

Press Enter twice to start the game.

Press the space bar to pause during a game, or to reactivate the game after a pause.

George is having a picnic. Fortunately, it's a sunny day and there is not a cloud in the sky. He's prepared a feast fit for a king and carefully laid it out on neat little tablecloth's. Unfortunately he spies an unwanted guest. An ant has come onto the tablecloth, attracted by food. Fortunately, George has brought his pest swatter, and he dispatches the ant with a quick flick. The ants are well organized and very hungry, and once they see food, will continue to attack it. Often they will approach the food and sit just out of range of the swatter, until enough have gotten together to push the food off the table and then off the screen. You must swat them as they try to make off with the goods.

Once one of the ants is eliminated, the food will stop moving, until another ant comes to help the others. George must be quick with his swatter. Unfortunately, there are stinging wasps in the area and they are just plain nasty. Their only purpose in life is to follow George around and make his life miserable by trying to sting him. The wasp may be swatted also, but if he stings you, George is deposited in the middle of the screen and is paralyzed for 5 seconds and you will be unable to move him. His face will flash red with embarrassment! George has also attracted spiders that bite. Although the spiders aren't interested in the food, they are not friendly! All they care about is spinning their webs

which must be swatted out of the way in order to get through them, and making sure that no one gets in their way or they will bite without warning. If you are bitten, George is deposited in the middle of the screen and his face will again flash red with embarrassment. George will be paralyzed for 3 seconds and you will be unable to move him. When his face stops flashing, George is again ready for action.

Each piece of food is worth points. The larger the food, the more points assigned to it, and the more ants it takes to move the food off the table. If the ants have managed to move the food off the table, but you have stopped them, you may be able to bring the food back. You must first swat all of the ants blocking the way back to the tablecloth, and then swat the food and drag it back to the table, swatting it again to release it. If you swat the food from the side, you may not be able to drag it

back to the tablecloth in one movement. You must release the food (by swatting again), and run around the back where you can push it back onto the table. Though this may sound confusing, you can easily master this technique. The food scores half as many points if it is not on the table when the round ends.

Each round consists of ninety seconds. The time left in the round appears in the top center of the screen. After ninety seconds are up, all action stops and the points for the food remaining are tallied. If all food is completely off the picnic tables, the game ends — if not, the remaining food is then repositioned on the table and the next round begins.

PICNIC PARANOIA will make you think twice about any picnic you've been planning and give you hours of hilarious fun staying home instead!
