

Please do not upload this copyright pdf document to any other website. Breach of copyright may result in a criminal conviction.

This pdf document was generated by me Colin Hinson from a Crown copyright document held at R.A.F. Henlow Signals Museum. It is presented here (for free) under the Open Government Licence (O.G.L.) and this pdf version of the document is my copyright (along with the Crown Copyright) in much the same way as a photograph would be.

The document should have been downloaded from my website <https://blunham.com/Radar>, or any mirror site named on that site. If you downloaded it from elsewhere, please let me know (particularly if you were charged for it). You can contact me via my Genuki email page: <https://www.genuki.org.uk/big/eng/YKS/various?recipient=colin>

You may not copy the file for onward transmission of the data nor attempt to make monetary gain by the use of these files. If you want someone else to have a copy of the file, point them at the website. (<https://blunham.com/Radar>). Please do not point them at the file itself as it may move or the site may be updated.

It should be noted that most of the pages are identifiable as having been processed by me.

I put a lot of time into producing these files which is why you are met with this page when you open the file.

In order to generate this file, I need to scan the pages, split the double pages and remove any edge marks such as punch holes, clean up the pages, set the relevant pages to be all the same size and alignment. I then run Omnipage (OCR) to generate the searchable text and then generate the pdf file.

Hopefully after all that, I end up with a presentable file. If you find missing pages, pages in the wrong order, anything else wrong with the file or simply want to make a comment, please drop me a line (see above).

It is my hope that you find the file of use to you personally – I know that I would have liked to have found some of these files years ago – they would have saved me a lot of time !

Colin Hinson

In the village of Blunham, Bedfordshire.

VOCABULARY

OF

ROYAL AIR FORCE EQUIPMENT

BOOK 9

CLOTHING AND ACCOUTREMENTS

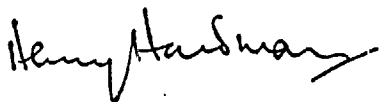

SECTIONS	NATURE OF STORES
19	Musical Instruments

**A.P. 1086, BOOK 9. CLOTHING :
INFORMATION AND INSTRUCTIONS**

1. **General Information and Index** of the Vocabulary of R.A.F. Equipment is contained in Book I of A.P. 1086.

2. **Accounting Instructions** for Clothing, and Equipment generally, are contained in A.P.830, Vol. 1, Parts 1 to 4, and current Defence Council Instructions. Note the instructions for marking clothing.

3. **Packing and Storage Instructions** are contained in A.P.830, Vol. 2.

4. **Scales of Clothing** are contained in A.P.830, Vol. 3, Part C.

5. **Appendix I** to this Instruction gives guidance on measurement and fitting.

7. Flying Clothing.

(a) Items of flying clothing for general issue to aircrew, covering their requirements *ad initio* to operational flying, are scaled in A.P.830, Vol. 3, Scale C.21.

(b) Special requirements of pressurised functional flying clothing and associated garments applicable to special aircraft are listed as aircrew equipment assemblies and published in scales C.22 (i), etc. Some of the items scaled in C.21 are also in scales C.22 (i), etc., but this does not authorise additional issues. Each of the scales in C.22 is published as a complete scale to ensure that aircrew personnel are in possession of all items listed in the appropriate aircrew assembly for the particular type of aircraft.

(c) All aircrew equipment assemblies include the necessary items of oxygen and electrical equipment.

8. If complete Life-saving Waistcoats are issued from Clothing Section, they should be made up and maintained to scale in conjunction with the Safety Equipment Section. Refer to the Safety Equipment Manual A.P.1182C.

9. It may be found convenient at P.S.C.O.s, large stockholding M.U.s and similar units to break this book down into individual Sections. Guide cards are supplied to facilitate this. Amendments will be noted in the Amendment Certificate and Record as they are actioned.

10. Errors, omissions, or unsatisfactory features in this book should be notified, with suggestions for improvements, to The Second Under Secretary of State, Ministry of Defence (Air), E.4 (R.A.F.), Harrogate, through the usual channels.

APPENDIX 1

INSTRUCTIONS FOR THE MEASUREMENT AND FITTING OF

BOOTS, SHOES AND UNIFORMS

1. BOOTS AND SHOES

1. (i) The proper fitting of boots and shoes is a matter of the first importance. Malformations of the feet are primarily caused by ill-fitting foot-wear, and where trivial ailments already exist, the supply and fitting of boots of the correct size will do much to eradicate the trouble, which, if neglected, may develop and necessitate hospital treatment.

(ii) Personnel who superintend the fitting of airmen's boots and shoes are to see that they are fully long enough, special care being taken that apprentices and boy entrants are not allowed to wear boots of too small a size. Airwomen's shoes are supplied in two different fittings for each size.

2. (i) The following instructions are to be observed:—

Boots and shoes are to be supplied to a length $2\frac{1}{2}$ to 3 sizes greater than the length of the foot, ascertained by size stick measurement when the individual is sitting, for the reasons (a), (b) and (c) below, but when the foot length is measured, whilst the person is standing, $1\frac{1}{2}$ to 2 sizes in length should be added to the measured length for the reasons (b) and (c).

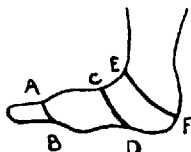

(a) The foot widens and lengthens under pressure.

(b) Sufficient allowance must be made to allow of the proper motions of the toes, otherwise they are thrust out of line, or "stubbed", this being the most prolific cause of malformation and bunions. In addition, if veins are unduly compressed, swollen feet result through faulty circulation.

(c) The contours or edges of the toe and seat of the bottom of the last are quite square whereas the foot is rounded, and allowance must, therefore, be made.

(ii) Boots and shoes are supplied in two or three different fittings for each size, as shown in the accompanying scale of measurements. The sizes and fittings are marked on the inside of boots and shoes and also on the outer soles of boots. The correct size and fitting should be ascertained by accurate measurement and reference to the scale.

N.B.—The joint (AB) and instep (CD) measurements of the foot should normally be the same as those given in the scale, but the heel of the foot (EF) should measure from $\frac{3}{4}$ in. to 1 in. less than the measurements shown for heel of last.

The heel measurement from one fitting to another is always an approximation: therefore, the fittings are only given with a graduation from one size to another of one-third of an inch. As a guide, a quarter of an inch allowance should be made in the heel measurement from one fitting to the next. When pencilled outlines are made, two sizes in length will be sufficient to allow over the length of outline, e.g. a foot having an outline length of 10 in. (*i.e.* size 5), will require a size 7 boot or shoe. Measurements should be taken when the individual is sitting. Pencilled outlines should be made while standing.

			8 $\frac{3}{8}$	9

(a) Increasing or decreasing by $\frac{1}{16}$ in. for each size.

(b) Increasing or decreasing by $\frac{1}{4}$ in. for each size.

APPENDIX I

2. UNIFORMS

3. The breast, waist, inside leg and seat measurements for airmen and bust, waist and hip measurements for airwomen will be ascertained by means of a measuring tape placed under the jacket or coat and over any underclothing, the equivalent garments being selected in accordance with the size rolls given at the end of this appendix.

4. Demands for clothing are to be made out after due consideration has been given to the measurements taken, allowance being made for any suitable garments held in stock. The greatest care is to be taken to avoid demanding garments of sizes for which there is no known requirement as this leads to :—

- (a) unnecessary alteration by the unit tailors,
- (b) overstocking at maintenance units,
- (c) deterioration in store, and
- (d) undue expense to the public in carriage charges.

When airmen or airwomen of unusual dimensions cannot be fitted from garments of ordinary stock sizes, measurements are to be taken by the unit tailor and recorded on a special size roll on which the signature of the tailor is to be obtained. Details of any peculiarity in shape or build are to be recorded on the last column of the form. The instructions on the reverse side of the special size roll should be carefully followed and all the necessary columns completed before the form is signed. Witnessing officers should verify the particulars given as undue delay in fitting-out airmen and airwomen will result if the measurements shown are incorrect. Any loss arising from errors in measuring for special size garments or preparing size rolls will be recoverable from the tailoring contractor. At units without a service tailor or civilian tailoring contractor, every endeavour is to be made to obtain the services of a qualified tailor to take the necessary measurements and complete the special size roll ; any charge for such services is to be met from public funds. Garments are not to be specially manufactured where a stock size can be made to fit by reasonable and inexpensive alteration. Where possible, demands for special size clothing should be forwarded to the maintenance unit six weeks before delivery is required. If on receipt of a special size garment it is found to require minor alterations, these are to be affected by the unit tailor.

5. Jackets and blouses should be fitted loosely over a pullover or cardigan so as to admit of extra clothing being worn in cold weather, and to allow for possible shrinkage. In fitting recruits and airmen returning from abroad, full allowance for future development should be made for all clothing including underwear. Allowance should also be made for shrinkage when issuing washable garments.

6. Personnel requiring clothing are to be paraded at the unit store and the necessary issues made in the presence of the witnessing officer; the tailor will be required to be present to receive instructions regarding the fitting and any necessary alterations to the garments.

APPENDIX 1

7. The Flight or Section Commander is to see that alterations are properly carried out and satisfy himself that garments are properly fitted. Personnel are on no account to have alterations to their uniform carried out except under the authority of the C.O. The pattern is on no account to be altered. The Flight or Section Commander will, if necessary, obtain the final approval of the C.O. to any alterations

8. In order to reduce to a minimum the number of exchanges of greatcoats necessitated by subsequent bad fitting, care should be exercised at time of issue. Greatcoats are intended to be worn loose and roomy. The sizes of greatcoats issued to airmen are to be determined by the height and not by the breast measurements and issues are to be made in accordance with the following table, which should normally result in the garments reaching between 2 and 3 in. below the bend of the knee.

Height of airman	Length at back from collar seam to bottom of greatcoat
4 ft. 9 in.—4 ft. 10 in.	37½ in.
4 ft. 11 in.—5 ft. 0 in.	38½ in.
5 ft. 1 in.—5 ft. 2 in.	40½ in.
5 ft. 3 in.—5 ft. 4 in.	42 in.
5 ft. 5 in.—5 ft. 6 in.	43 in.
5 ft. 7 in.—5 ft. 8 in.	44½ in.
5 ft. 9 in.—5 ft. 10 in.	45½ in.
5 ft. 11 in.—6 ft. 0 in.	47 in.
6 ft. 1 in.—6 ft. 2 in.	48½ in.

9. W.R.A.F. Officers and airwomen may be permitted to alter the length of their greatcoats, skirts and tropical frocks to conform with prevailing fashions as directed by D.W.R.A.F. from time to time. Extremes of fashion are not allowed. The length of all W.R.A.F. uniform skirts is to be not less than 2 ins. below the centre of the kneecap. Greatcoats are to be 1 in. longer than the skirts. Whenever possible a 2 ins. hem is to be maintained on these items of uniform.
